Global VAT Compliance Solution: A consolidated compliance view

0:00-0:24

Managing VAT compliance across multiple jurisdictions requires clear, timely visibility. Grant Thornton's Global VAT Compliance solution brings key compliance information together in one centralized dashboard. Backed by experienced Grant Thornton professionals, it helps clients navigate complexity and stay ahead of upcoming deadlines with confidence.

Overview metrics: Status at a glance

0:24-0:40

At the top of the dashboard, summary metrics provide a quick view of the compliance status. Clients can see total deliverables, overall completion, submitted returns, late submissions, and processing risk. This management-level view makes it easier to understand compliance progress, timeliness, and potential risk across jurisdictions.

Interactive map: Monitor compliance globally

0:40-1:03

The interactive world map provides a country-level view of compliance status. Color-coded jurisdictions help users identify deliverables that are completed, in progress, and not started. Filters allow clients to focus on completion, deadline risk, late submissions, submission percentage, or specific statuses, making it easier to identify the jurisdictions that need attention.

Deliverables table: Review obligations

1:03-1:17

Below the visualization, the deliverables table provides obligation-level information by jurisdiction, return type, status, reporting period, and statutory due date. This detailed view helps clients review individual requirements and prioritize upcoming and outstanding items.

Return details: Review without leaving the dashboard

1:17-1:29

For a closer look, users can select a deliverable and open the details panel. This panel brings together information such as VAT payable, the reconciliation breakdown, supporting data, and adjustment line items. This allows clients to review key return information while remaining within the dashboard.

Chart view: Flexible reporting

1:29-2:03

Clients can also switch from Map View to Chart View to examine completion status and jurisdiction-level information in a different visual format. The real value isn't simply tracking obligations. It's combining technology-enabled visibility with the professional experience, responsiveness, and guidance Grant Thornton brings to every client engagement, helping organizations stay ahead of change today and into the future.
