

# Executive Forum 2024: Tech-driven efficiency and integration — energy industry use cases

## Teaser Video Transcript

### Enhancing Integration & Efficiency

If we look at the left hand side, we're going to focus today's session on the foundational use cases, right? What are the key, I'll say building blocks that enable the right hand side, which is the supplemental use cases. You know, just a reminder of folks that everybody has the ability to download the course material where you're able to click the Grant Thornton Energy CFO survey to see the results. See some other statistics we have not covered here in the previous slide. And just one call out, it was as we saw, 40% of the respondents from the Grant Thornton Energy Finance Leader survey identified achieving operational efficiency as their top business challenge for second-half of 2024. Now let's get into what those use cases are.
